## Work experience

### Frontend Developer, Seel 🏢

Jun 2023 – Present (1y)

A B2B SAAS company  
B2B

Kafka    Node.js    Postgres    Figma    Next.js

- Implemented new designs to create visually appealing and interactive web interfaces based on design team specifications.
- Transformed Figma prototypes into pixel-perfect, cross-browser compatible web pages for seamless user experience.
- Collaborated with design and development teams to enhance existing designs and user flows, improving usability and overall user experience.

### Software Engineer, Garmspot 🏢

Jun 2022 – Present (2y)

An e-commerce company for the fashion industry  
Fashion

iOS    Android    Wordpress    Firebase    Next.js    Flutter    Git    monday.com

- Building a Cross-Platform Mobile App using Flutter as the frontend framework.
- Utilizing WordPress and WooCommerce REST API as the backend to manage product listings, orders, and customer data.
- Integrated Firebase Messaging for push notifications.
- Leveraged WordPress as a CMS, with WooCommerce for e-commerce functionality.
- Implementing custom REST API endpoints in WordPress to provide data to the Flutter app securely.
- Integrated Firebase Authentication for user sign-up and login, ensuring secure user access.
- Gained a deep understanding of the Apple App Store submission process.
- Worked with Xcode, Apple's integrated development environment, for building and debugging the Flutter app for iOS.
- Utilized TestFlight for beta testing and gathering user feedback before final release.
- Conducted extensive testing to identify and resolve bugs, compatibility issues, and performance bottlenecks.
- Utilized Flutter's testing framework to write unit and widget tests for the app.

- Collaborated with quality assurance teams to perform manual testing and gather feedback.
- Implemented robust security measures to protect user data, such as securing Firebase API keys.
- Maintained thorough documentation for the app's architecture, API integrations, and development processes.
- Managing and Maintaining existing Web Applications using WordPress
- Building out responsive pages using tools like Elementor and Divi
- Collaborating to ensure the e-commerce processes are going smoothly on WooCommerce
- Responsible for developing custom themes, and templates to meet project specifications
- Managing the front end of existing Mobile Application
- Responsible for website deployment, maintenance, and troubleshooting
- Working to Roll out designed e-mails to users using MailChimp
- Testing Headless CMS application feasibility using RestAPI and Nextjs

### Technical Writer, Medium

Feb 2020 – Present (4y 4m)

Publishing

PHP React React Native Next.js Flutter
